**Wonderful, functional and reliable**

Regardless of whatever style you prefer – in the personal combination of awning cover and technology you are bound to find precisely the markilux pergola cubic that fulfils your requirements perfectly.

# mx\_pergola cubic

## Essentially square. Practically superb.

### markilux pergola cubic

The design of the new markilux pergola cubic was developed entirely in the spirit of the Dessau Bauhaus philosophy. Functional, clear and timeless contouring on the basis of cubist simplification. In addition to the proven solar protection benefits offered by the pergola, this model integrates itself harmoniously and impressively into today's modern architecture and makes a big impression – not only with its high-quality workmanship.

**Reduced design language**  
The angular cassette, 200 x 160 mm, offers room for large-scale solar protection up to 600 x 450 cm or 500 x 600 cm, and as a coupled unit a whole lot more.

**markilux shadeplus**  
More shade and protection – even when the sun is low in the sky. Optionally solar driven using markilux sundrive.

### The pinnacle of quality and convenience

Extras for more shade, light and warmth – discover all the ways you can personalise your awning in the showroom of your markilux specialist dealer and at [markilux.com](http://markilux.com)

**LED Line**  
 Light for reading or socialising, optionally on the guide tracks and/or in the lighting bar, dimmable. For pergola style/cubic/compact also available in the cassette.

**Telescopic post**  
 For better water drainage, the posts can be lowered between 20 and 40 cm. On request with a motor. Cannot be combined with lighting in the posts and footplate covers in the pergola style.

**markilux sundrive**  
 An integrated solar module can drive the shadeplus motor. When the awning is extended, the front profile and the guide tracks finish perfectly flush with one another.

**LED Spots attached to the light bar**  
 The spotlights provide perfect contrast lighting in the evening hours. And they can be pivoted and dimmed, of course!

**Ballast boxes**  
 Give your markilux pergola reliable stability when securing the front posts in the foundations is not possible or desired.

**Stainless steel crank**  
 Bring the adjustable posts to the desired height in no time at all.

**Lateral wind protection and extra privacy**  
 For protection from wind, weather and prying eyes, markilux offers you versatile textile solutions. We would be happy to advise you!
